Automated Feedback Analysis Workflow

Raisa Vigo Fonseca

AI Automation | Project 3

Introduction

Project: Automate Customer Feedback Analysis with AI

Role: Customer Success Manager

Goal:
Build an automated workflow to collect, analyze, and act on customer feedback in real time.

Tools Used:
Google Forms • Make • Gemini AI • Google Sheets

Outcome:

- Collects and analyzes customer responses
- Classifies sentiment (Positive / Neutral / Negative)
- Summarizes feedback automatically
- Sends email alerts for negative sentiment

Challenges & improvements

Impact:

- Turned raw feedback into actionable insights
- Improved team awareness and customer satisfaction
- Overcame Gmail trigger configuration challenges in Make

What Can Be Improved:

- Add visual dashboards (Looker Studio/Power BI) for trend analysis
- Integrate Slack or Teams alerts for faster response
- Expand to multilingual sentiment analysis for global feedback
